Graduates; *Public Schools; *School Personnel; Teacher Distribution; *Teacher Employment; Teacher Student Ratio

ABSTRACT

How many students were enrolled in public elementary and secondary schools in 1995-96? How many staff members were paid to teach, supervise, and provide support services for education? How many students graduated from high school? The information to answer these and other questions is provided in this National Center for Education Statistics (NCES) report, the State Nonfiscal Survey of Public Elementary and Secondary Education. The survey is an annual state-level collection of student, staff, and high school graduate counts for grades prekindergarten through 12. The data are collected from state education agencies, processed and edited by the U.S. Bureau of the Census, and then verified by NCES. The data show that about 2.6 million teachers provided instruction in public elementary and secondary schools during the 1995-96 school year; that there were 44.8 million students enrolled; and that 2,274,000 students received regular high school diplomas. The report also contains definitions, one figure, and three tables. (LMI)

NATIONAL CENTER FOR EDUCATION STATISTICS

Statistics in Brief

July 1997

Public School Student Staff and Graduate Counts by State, School Year 1995-96

Contact: Jonaki Bose (202)219–1619 How many students were enrolled in public elementary and secondary schools in 1995-96? How many staff members were paid to teach, supervise, and provide support services for education? How many students graduated from high school? The information to answer these and other questions is reported in the National Center for Education Statistics' State Nonfiscal Survey of Public Elementary and Secondary Education, School Year 1995-96.

How Many Students Were Enrolled in Public Elementary and Secondary Schools?

In school year 1995–96, there were 44.8 million students enrolled in public elementary and secondary schools in the 50 states and the District of Columbia (table 1). Of these students, 25.1 million were in prekindergarten through grade 6, an additional 19.0 million were in grades 7 through 12, and the remaining 0.7 million were ungraded students. (The five outlying areas are not included in national totals.)

California had the most public elementary and secondary school students (5,536,000), followed by Texas (3,748,000) and New York (2,813,000). The three lowest student counts were in the District of Columbia (80,000), Wyoming (100,000), and Vermont (106,000).

How Many Teachers Were There?

About 2.6 million teachers provided instruction in public elementary and secondary schools in the 1995–96 school year (table 2). Among this group, 1,429,000 were elementary school teachers (including prekindergarten and kindergarten teachers) and 952,000 were secondary school teachers. The remaining 217,000 teachers taught ungraded students or were not assigned a specific grade.

The ratio of total students to total teachers for the nation was 17.3 students per teacher. These ratios ranged from lows of 13.8 students per teacher in New Jersey and Vermont to highs of 24.0 in California and 23.8 in Utah. The median student per teacher ratio was 16.7:1, that is, half the states

had a higher student/teacher ratio than 16.7:1, and half the states had a lower ratio. Student/teacher ratios should not be interpreted as average class size since not all teachers are assigned to a class (for example, music and reading teachers in elementary schools).

How Many Staff Supervised or Provided Support Services for Public Education?

addition to the teachers described previously, about 494,000 teacher's aides directly assisted teachers in providing instruction (table 3). An additional 34,000 instructional coordinators and supervisors through curriculum helped teachers development and in-service training. Support staff for students included 88,000 guidance counselors and 51,000 librarians. This translates to about 512 students for every guidance counselor reported, and 882 students for each librarian. An additional 1,218,000 staff members provided support services for schools and students. This support included maintenance, food, health, library, transportation, security and other services in the nation's public schools. There were 121,000 school administrators (mostly principals and assistant principals), 49,000 school district administrators, and about 342,000 administrative support staff.

The relative distribution of all staff is illustrated in figure 1. Instructional staff made up 63 percent of all staff. Another 27 percent of all staff provided support services to schools and students. Administrative staff made up 10 percent of all education staff. On the average, there were 15 teachers and 9 support staff for each administrator. All of these distributions and ratios vary greatly from state to state.

How Many Students Graduated from High School During the 1994-95 School Year?

Some 2,274,000 students received regular high school diplomas in the 50 states and the District of Columbia during the 1994-95 school year and subsequent summer (table 4).

An additional 207,000 students received diplomas or alternative high school equivalency certificates (the latter group includes only those who are 19 or vounger except in Minnesota where they are 20 or younger). National totals for alternative and high school equivalency certificate recipients and other completers represent an undercount due to missing data in some states. Finally. some 22,000 students received some high school completion certificate other than a diploma. Note that some states grant only regular diplomas and the high school equivalency certificates.

Technical Notes

The "State Nonfiscal Survey" is an annual state-level collection of student, staff, and high school graduate counts for grades prekindergarten through 12. The data are collected from state education agencies (SEAs), processed and edited by the U.S. Bureau of the Census, and then verified by NCES. The "State Nonfiscal Survey" is part of the Common Core of Data collection.

All staff counts (including teachers) are in full-time equivalency units. This is the amount of time required to perform an assignment stated as a proportion of a full-time position, and computed by dividing the amount of time employed by the time normally required for a full-time position.

All states and outlying areas provided data for this survey. However, state agencies vary in their data collection and reporting systems, with resulting inconsistencies across states.

Values that were missing and not reported elsewhere by the states were imputed. These items are noted as "imputed" in the data tables. The method used for all of the imputations was to: (a) create a subset of states reporting the item in question; (b) calculate the ratio of the missing item to total student membership for each state in the subset; (c) calculate the average ratio of item to membership; (d)

3

multiply the total student membership of the state with the missing item by the average ratio; (e) substitute the imputed estimate for the missing item and then recompute the subtotals and totals. Imputations for prekindergarten students were ratioed to total students in grades K-12. Imputations for prekindergarten teachers were ratioed to prekindergarten students. Missing prekindergarten students were imputed first, and missing staff counts afterwards. Totals and subtotals are footnoted in the tables when one or more items included in the total are imputed or adjusted.

Several states collapse two or more categories of staff into one. In these cases, NCES disaggregates this number by distributing the

reported amount to the several categories based on the average distribution of these staff in other states. Values affected by these distributions are footnoted as "adjusted" in the data tables. NCES made no adjustments or imputations to high school equivalency or other high school completion data.

For further information

For additional information about this *Statistics* in *Brief* or the complete data set, contact Jonaki Bose, National Center for Education Statistics, 555 New Jersey Avenue NW. Washington, DC 20208-5651; or call (202) 219-1619; or fax (202) 219-1728; or electronic mail to Internet address "jonaki_bose@ed.gov".

Definitions

Administrative Support Staff: This category contains staff members who provide direct support to LEA and school administrators. This includes secretarial and other clerical staff, and persons whose activities are concerned with support of the teaching and administrative duties of the office of the principal or department chairpersons.

Graduate, High School: This is an individual who has received formal recognition from school authorities, by the granting of a diploma, for completing a prescribed course of studies at the secondary level school. See "Regular High School Graduates."

High School Equivalency Certificate: This is a formal document certifying that an individual met the state requirements for high school graduation equivalency by obtaining satisfactory scores on an approved examination, and meeting other performance requirements (if any) set by a state education agency or other appropriate body.

High School Equivalency Recipients: These are individuals age 19 or younger who received a high school equivalency certificate during the previous school year or subsequent summer.

Membership Count: This comprises the total student enrollment on October 1 (or the closest school day to October 1) for all grade levels and ungraded pupils. Includes students both present and absent on the measurement day.

Other Diploma Recipients: These are individuals who received a diploma from other than the regular school program during the previous school year and subsequent summer school.

Other High School Completers: These are individuals who received a certificate of attendance, or other certificate of completion, in lieu of a diploma during the previous school year and subsequent summer school.

Other Student Support Staff: This category contains library support staff, professional and supervisory staff providing non-instructional services to students, and support services staff not reported in other categories, (e.g., data processing, health, building and equipment maintenance, bus drivers, security, and food service workers).

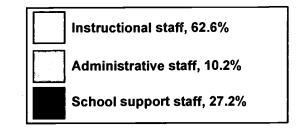

Regular High School Graduates: These are those graduates who received a regular diploma during the previous school year and subsequent summer school.

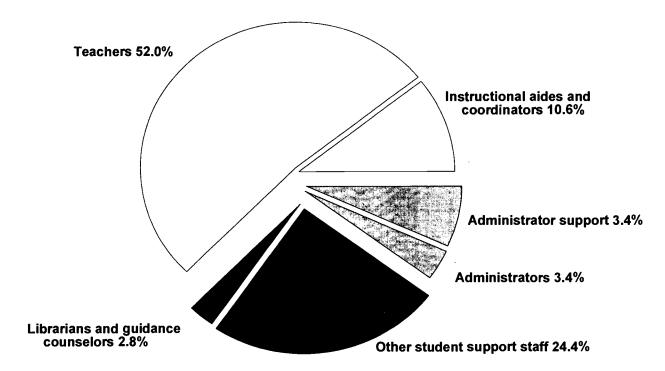

Teachers of Ungraded Classes: This category includes teachers of classes or programs to which students are assigned without standard grade designation.

Ungraded: These are classes or programs to which students are assigned without standard grade designation.

Figure 1.— Distribution of elementary and secondary education staff by category: School year 1995–96

Note: Details may not add to the total due to rounding

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data, State Nonfiscal Survey.

9

b/ Prekindergarten teacher counts were imputed based on current year data (Fall 1995) for California and

c/ Wyoming, and Virgin Islands do not have prekindergarten programs.

NOTE: Teacher counts are full-time equivalency (FTE) counts. Elementary and secondary teacher counts are not directly comparable across states due to differences in the grades included in these designations.

Data missing or not available.

U.S. Department of Education, National Center for Education Statistics, Common Core of Data, State Nonfiscal Survey.

c/

a/ Regular high school graduates may include summer graduates not included in 12th grade membership. b/

Includes recipients ages 19 or younger, except in Minnnesota where they are ages 20 or younger.

National totals for other diploma recipients, high school equivalency recipients and other high school completers are undercounts due to missing data in some states.
